React Session — Date :- 8/10/26

React Form :-

ES6 Features of JS :-

1) setTimeout
2) setInterval
3) Event loop
4) Call back queue
5) Asynchronous Proy
6) Promises
7) async await
8) Form

setTimeout :-

```
console.log("Hello")
const t1 = setTimeout("c.log('Hi1')", 1000)
const t2 = setTimeout("c.log('Hi2')", 2000)
c.log(t1)
c.log(t2)
```

	Expected O/P	Actual O/P
↓	Hello	Hello
	Hi1	1
	Hi2	2
	1	Hi1
	2	Hi2

```
Array.map((e) => { c.log(- - )
```

Higher Order Fun?

Callback Fun?

* setTimeout :- It is asynchronous JS browser fun?. And it is also a higher order fun?.
  - It wait to execute or delay execution of callback fun? up to whichever time we mentioned as timeout.
* callback queue :- It's manage the execution of callback fun? of setTimeout
* Event Loop :- Check the if any callback is in waiting callback queue then

they check if call stack is empty or not. if call stack is empty then they pass this fun^n to call stack for execution.

* call stacks :- Manage the execution of all fun^n execution context.
